

Hallmark Services

# Hallmark Services

is a technology-driven solutions management company specialising in Facility Management Services for residential buildings and commercial office spaces in South Mumbai. A home-grown business, we have over 14 years of comprehensive expertise and industry experience.

With the advent of COVID-19, the team at Hallmark Services operates as per the latest cleaning and sanitisation guidelines issued by the World Health Organisation and the Centre for Disease Control.

We are more determined than ever to aid the people of Mumbai during this pandemic by providing an organized, efficient and professional service, ensuring that we go over and above to fulfill our customer's requirement.

## Why Choose Us?

- ✓ SUPERIOR CUSTOMER SERVICE
- ✓ PPE SAFETY SUIT
- ✓ NON-TOXIC & ECO-FRIENDLY
- ✓ WHO, EPA & FDA APPROVED
- ✓ 99.9% VIRUS & BACTERIA KILL RATE

# Disinfection & Sanitisation Treatment

## How it Works?

- ✓ Disinfection and sanitisation of the entire house/office/commercial space using hospital-grade, eco-friendly chemicals
- ✓ We use an Anti-viral Fumigation Device (ULV Fogger) with WHO, FDA and EPA approved anti-viral disinfectant
- ✓ Our cleaning agents are equipped from head to toe with PPE (Personal Protection Equipment)
- ✓ The time of the entire process will vary depending on the size of the residence/office space
- ✓ Our disinfectant is odourless, stainless, eco-friendly and non-toxic

## We Exclude:

- ✓ Sanitisation of any object meant for oral use or consumption
- ✓ Sanitisation of the interiors of any cupboards, drawers or any electronics, appliances
- ✓ Movement of furniture for sanitisation

# Pre & Post Service Precautions

- ✓ All electrical devices should be covered by the client prior to the treatment
- ✓ No person or pet should enter the treated areas for a minimum of 20-30 minutes. To ensure this, the service provider will leave out one room for your use which will be treated after the rest of the house is ready for use
- ✓ Treated surfaces are okay to use following 15 minutes of the treatment
- ✓ Post treatment, the area's windows and doors are to be opened for ventilation so that the remaining chemical residue can air out completely
- ✓ Once the area is ventilated, staff/residents can enter the treated area post 30 minutes
- ✓ Before the service begins, make sure to keep your laundry and food items away as safety measures
- ✓ All valuables, money and ornaments, if any, should be removed and kept under lock and key

# Virosil Disinfectant Details

- ✓ Virosil is an eco-friendly, non-toxic disinfectant and fumigant (aerosol) certified as safe and effective for use in hospitals, quarantine centres, isolation wards, offices, school & college campuses, IT parks, polyclinics, buses metros & railways, airports, shopping malls & retail outlets
- ✓ Virosil guarantees 99.99% elimination of air-borne bacteria and fungi
- ✓ Cold sterilization
- ✓ Tests show it to be effective on all types of viruses, bacteria, fungi, moulds and algae. (including Coronavirus)
- ✓ Requires no rinsing
- ✓ Non-mutagenic
- ✓ No foul odour and no irritation to the eyes
- ✓ Requires no de-fumigation and is very safe and easy to handle
- ✓ Dry up period of only 15-20 minutes
- ✓ zero alcohol content
- ✓ can be applied to any electronic device, wall, surfaces or furniture without fear of damage

## Terms & Conditions:

- ✓ Rates are exclusive of all taxes
- ✓ Payment Term: 100% Advance

# ULV (Ultra Low Volume) Fogging Machine Details

- ✓ It emits water droplets as small droplets size anywhere between 5 to 30 microns
- ✓ The foggers are equipped with motors that produce a high power-low pressure air stream.
- ✓ The solution then gets pumped into a special nozzle to give the air flow a swirling motion
- ✓ A high air pressure produced by the motor helps to spray the fogging liquid through the nozzle separating it into tiny particles.
- ✓ The liquid solution gets sprayed out of the nozzle in the form of a fog or a fine mist.
- ✓ ULV foggers mostly work on electricity, which is needed to power an electrical motor.
- ✓ The particles size ULV Fogger can be adjusted to output a precise particle size, which enables different applications of the machine.
- ✓ Also, because ULV foggers use cold-fogging techniques and do not get heated to high temperatures, they can be used both indoors and outdoors.
